Professional Summary

Junior DevOps and Cloud Support Engineer with a strong foundation in computer science and hands-on experience in CI/CD pipelines, containerized deployments, and cloud infrastructure. Skilled in Docker, AWS services, and Linux server administration. Experienced in monitoring system health, debugging deployment issues, and supporting application delivery workflows in collaborative agile environments.

Professional Experience

TNT Dash

Remote

Junior DevOps & Cloud Support Engineer

2023–Present

- Assisted in maintaining and updating CI/CD pipelines, supporting automated build and deployment workflows with a 30% improvement in deployment frequency
- Supported Docker image builds, tagging strategies, and push workflows to container registries; debugged container startup and runtime issues
- Worked with AWS services including ECS, ECR, and CloudWatch to monitor task health, analyze logs, and validate post-deployment application behavior
- Assisted in managing AWS Secrets Manager entries, ensuring correct injection of environment variables and connection strings into containerized tasks
- Verified deployments across preprod and staging environments and coordinated with development teams for issue resolution

Mulytic Labs GMBH

Dhaka, Bangladesh

Technical Support Engineer

2021–2023

- Administered Linux-based production servers, handling configuration, optimization, and security hardening to maintain 99.9% uptime for high-profile clients
- Configured Nginx reverse proxy and SSL setups; managed DNS and domain configurations for multiple production environments
- Implemented and monitored AWS cloud services and Elasticsearch (ELK Stack), improving data retrieval speeds by 40% and enabling rapid log analysis
- Analyzed system logs via Kibana and Grafana to identify health check failures, configuration issues, and runtime errors; documented findings in runbooks
- Coordinated with development and infrastructure teams on IAM permissions, replication configurations, and environment variable management

Key Projects

CI/CD Pipeline & Containerized Deployment Workflow

- Designed and maintained end-to-end CI/CD pipelines using GitHub Actions for automated build, test, and deployment processes
- Containerized multi-service applications using Docker and Docker Compose; managed image versioning and tagging strategies
- Deployed and monitored services on AWS ECS, validating task definitions, health checks, and CloudWatch log streams post-deployment

AWS Infrastructure Monitoring & Secrets Management

- Integrated AWS CloudWatch for real-time monitoring of ECS services, log analysis, and alerting on deployment and runtime failures
- Managed environment-specific secrets and API keys using AWS Secrets Manager, ensuring correct formatting and secure injection into ECS task definitions
- Documented deployment steps, troubleshooting guides, and runbooks for common infrastructure issues to support team onboarding

University Course Management System

- Built using ASP.NET Core and MS SQL with features including user authentication, course registration, and scheduling
- Deployed the application on a Linux server with Nginx as a reverse proxy and configured SSL for secure access
- Reduced administrative workload by 50% through automation of key academic processes

Education

International Islamic University Chittagong

B.Sc. in Computer Science and Engineering

2013–2018

Thesis: "Techniques for Noisy Health Data Integration with Privacy Preservation"

Supervisor: Dr. Shahidul Islam Khan

Technical Skills

DevOps & CI/CD: Azure DevOps, GitHub Actions, CI/CD Pipelines, Git

Cloud & AWS: AWS ECS, ECR, CloudWatch, Secrets Manager, EC2, IAM

Containers: Docker, Docker Compose, Dockerfile optimization, Image Tagging

Infrastructure: Terraform (basic), Kubernetes (basic), Linux Server Admin, Nginx, Apache, SSL, Reverse Proxy

Monitoring: CloudWatch Logs, ELK Stack, Kibana, Grafana

Programming: Python, C#, ASP.NET, Dart, Bash

Databases: MySQL, PostgreSQL, Elasticsearch, SQLite

Publications

2019: Biplob, M.B., Khan, S.I., Sheraji, G.A., and **Ahmed, J.** "Hybrid Feature Selection Algorithm to Support Health Data Warehousing". ICICCT 2019, Istanbul, Turkey.

Languages

English: Professional working proficiency

Bengali: Native proficiency
